

## Milk Usage Chart

Using your CCFP Monthly Meal Count Record, take the total number of children claimed and multiply by the minimum required ounces of milk needed by age group for each meal type served. If more than one type of snack (morning, afternoon, evening) is claimed, enter the combined total of all snack types (with milk) served by each age group. Compare your milk receipts to this grand total to determine if you have purchased enough milk for the claim month.
